## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 22 recites the limitation "a said longitudinally disposed wave-shaped strut" in last two lines of the claim. It is not clear that the recited limitation is new limitation or the same limitation recited earlier. Clarification is required.

### ***Specification***

The amendment filed 2/5/2007 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the claims. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: a wave "having no straight sections" (claim 21, line 5) and "wave-shaped struts has no straight sections" (claim 22, line 6).

Applicant is required to cancel the new matter in the reply to this Office Action.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3773

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 21-22 are rejected under 35 U.S.C. 102(b) as being anticipated by SIMON et al. (5,354,308).

As to claim 21, SIMON (Fig. 1-5) shows stent 14. Stent 14 comprises wire 4 defining longitudinal wave struts with links 6 for maintaining the struts in a tubular structure. The frequency of the struts at the two ends of the stent is greater than the frequency of the struts in the intermediate section of the stent (Fig. 4).

As to claim 22, SIMON (Fig. 5) shows stent 14 having links 16 axially displaced in the manner as recited in the claim.

### ***Response to Arguments***

Applicant does not argue and therefore agree with the examiner's contention that the original specification does not support the key limitations "having no straight sections" (claim 21) and "has not straight sections" (claim 22) and these limitations are new matters. Applicant must cancel these limitations in the claims. Without these limitations in the claims, the rejections of claims 21 and 22 over Simon-'308 as indicated above are therefore proper.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
